

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 609532.

ener2i Innovation Voucher Moldova 2014-2015

IV_MD_2015_68 Innovative solutions for efficient energy consumption in public lighting systems

Objective

The objective of the project is to develop a comprehensive innovative solution for an improved and efficient energy consumption in public lighting systems. A combination of modern technical components including LEDs, IT components and renewable energy sources (RES) will be applied to this end. The solution will be tested and implemented in the city of Ungheni.

Expected outcomes

- Energy savings for the city council of Ungheni;
- Reduction of costs related to public lighting.
